

Into the Wilderness Map 2

PREVIEW BOOKLET

Into the Wilderness: Map 2 is a map-pack by Crooked Staff Publishing that depicts the layout of a single wilderness encounter area (in this instance a small stream in a lightly wooded area). What follows is a brief preview of what is contained in this product:

PDF BOOKLET

A pdf booklet containing three versions of the same map; one overlaid with a square grid, one overlaid with a hex grid, and one with no grid overlay at all.

JPG IMAGE FILES

Each map (i.e. the square grid, hex grid, and gridless version) is also provided as a jpg image optimised for use with virtual tabletops (note that these have been scaled at 50 pixels per grid square)

BATTLEMAPS

In addition, all three versions of the map have been supplied as multi-page, miniatures scale, pdfs - so that they can also be used as impromptu battle-mats.

Please note that the battlemaps are not intended to be comparable to high-resolution dungeon tiles (as there are far better options for that kind of thing available from other sources), but are rather a simple and effective way of transforming this wilderness map into a quick battlemat (should the need arise).

BATTLEMAP EXAMPLE
